

Application Pack

ITSMalta exists to promote the development and deployment of Intelligent Transport Systems (ITS) in Malta for safer, more efficient and more sustainable transport

ITSMalta
Intelligent Transport Systems

What does ITS mean?

Intelligent transport systems (ITS) are advanced applications which, without embodying intelligence as such, aim to provide innovative services relating to different modes of transport and traffic management and enable various users to be better informed and make safer, more coordinated, and 'smarter' use of transport networks.

Examples of ITS in use are:

- Traffic Control
- Travel Information
- Incident Management
- Weather Reporting
- Environment Monitoring
- Speed Enforcement
- And the integration of multi-modal transport
- Provide opportunities for practitioners, stakeholders and interested parties to meet.
- Promote ITS principles
- Increase knowledge and awareness of ITS best practice worldwide

What does ITSMalta do?

ITSMalta promotes the benefit of Intelligent Transport Systems. It raises awareness of ITS and provides networking opportunities through periodic newsletters, conferences, seminars and workshops by engaging with the media on the use of information and communication technologies in transportation.

As an organized industry platform, it will promote the interest of Malta ITS stakeholders. This will increase customer awareness and ultimately sales both in Malta and abroad.

It aims to advise Government on ITS policy matters from the enterprise knowledge society and transport perspective in accordance with its mission statement and the interest of its members. This encompasses a more strategic and coherent approach to efficient fleet management for buses, trucks and vans, of safer and better managed roads and to realise value for money from public investments.

ITSMalta exists to promote the development and deployment of Intelligent Transport Systems and Services (ITS) for safer, more efficient and more sustainable transport.

Increase your Knowledge of ITS

ITSMalta intends to act as the backbone of technical knowledge providing your organization access to technical information and engagement with specialists in the relevant ITS area.

Exchange Ideas with like minded Individuals

As an Independent body we are able to freely exchange ideas, views and the latest intelligence on topical subjects. Membership is drawn from public and private sectors and will facilitate the exchange of high quality information and knowledge between key people in the industry

Opportunities to Promote your Organisation

Presentations and conferences, presence at exhibitions, and submissions of articles and news worthy items provides promotion opportunities so you can be well known within the ITS community and seen as a player in the industry.
